About Product

FuelTech PS-150/300/500/1500/3000 is a high precision sensor responsible for general pressure readings (fuel, oil, boost, exhaust back pressure, etc.)

Basic Information:

- Connection: 1/8" - 27NPT
- Pressure Range: 0 to 150/300/500/1500/3000 psi
- Power Voltage: 5V
- Output Scale: 0.5-4.5V
- Electric Connector: 3-way Metri Pack 150

Important notes

- **For use in boostcontroller the sensor must be connected to the top of the wastegate with a hose with a maximum length of 1ft. It prevents damage to the pressure sensor caused by vibration.**
- **The pressure sensor must be installed on an exclusive line, and not shared with any other connection, to avoid reading errors.**

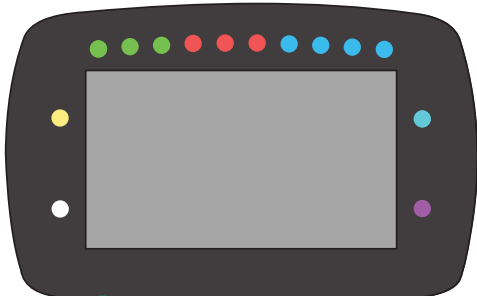

Electrical connection

Pin A: Battery's Negative

Pin B: 5V supply

Pin C: White input

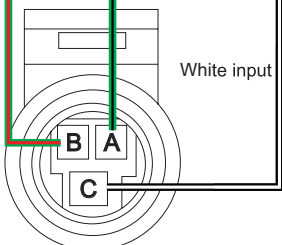

All products manufactured by FUELTECH are warranted to be free from defects in material and workmanship for 90 days following the date of original purchase.
